

On the Subject of Next In Line

Unlike elementary school, cutting in line is allowed.

- To begin this module, cut the first wire.
- In the table below, use the color of the previously cut wire as the column in conjunction of the current wire number to determine the color of the wire that you should cut next. Not cutting a wire will still increase the iteration count.
- A cut will only be processed when the button is pressed, and thusly any wire that was incorrectly cut/skipped will only incur a strike when the button is pressed.
- Incorrectly cutting/skipping a wire will reset this module back to iteration 2.

		Last wire cut							
Iteration		Red	Orange	Yellow	Green	Blue	Black	White	Gray
	2	Blue	Gray	Orange	Yellow	Red	Green	Black	White
	3	Yellow	Red	Gray	Blue	Orange	White	Green	Black
	4	Orange	Green	Blue	Black	White	Gray	Yellow	Red
	5	Green	White	Black	Gray	Yellow	Orange	Red	Blue
	6	White	Black	Green	Orange	Gray	Red	Blue	Yellow
	7	Black	Yellow	White	Red	Green	Blue	Gray	Orange
	8	Gray	Blue	Red	White	Black	Yellow	Orange	Green
